EXPERIENCE

Jr. Software Developer

VASP Technologies

Aug 2024 - Current

Guwahati, Assam

- Developed and integrated APIs using PHP & Laravel projects, including an eBook publishing platform (admin panel for articles, authors, media, publications) and a CareBus app (React + Vite, authentication, secure login).
- Built and deployed 2 Websites (conf. event and school websites) using React, CSS, JavaScript featuring real-time countdown, registration, video player, dynamic content, media gallery, and embedded YouTube videos.
- Designed responsive UIs and optimized data flow with Redux state management, ensuring scalable, user-friendly experiences across web applications.

Software Developer Intern

NEILIT

Jan - july 2024

Guwahati, Assam

- Developed a Mental Health Support Web and Mobile App using the MERN stack, React.js, and React Native with secure authentication and state management (Redux).
- Reduced load time by 20 percent by implementing lazy loading for components and images, and optimizing API calls with pagination

PROJECTS

Student Management App MERN Stack [\[Code\]](#)

- Built a full-stack Student Management System using user authentication and complete CRUD functionality.
- Developed RESTful APIs for managing student data and implemented image upload functionality using Multer middleware.
- Designed a responsive and intuitive UI with seamless navigation using React Router.

ACHIEVEMENTS

- Achieved the prestigious **Anundoram Borooah Higher Secondary Award**, recognizing academic excellence and accomplishments in higher secondary education.

LEADERSHIP

Served as a Co-Ordinator at Coding society of my college, Creating a coding environment by organizing contests, teaching and helping students as a mentor with mentoring over 200+ students.
